

WITH 12 MODELS TO CHOOSE FROM, YOU'RE SURE TO FIND THE PERFECT ROCK ENCLOSURE TO COVER ANYTHING YOU WANT TO HIDE.

A note about measurements: Length and width measurements for each product are taken at the base. The height measurement is the highest point of each rock. Because the shapes are irregular, these measurements are guides for the size of an item that will fit under the enclosure. If you have any questions about whether an item will work with a particular rock, visit our website to use our SIZE-A-ROCK calculator.

MODEL 101 - Classic shape with generous dimensions

- Well/Septic up to 18" Tall
- Centrifugal Pumps
- Small Pump Systems
- Backflow Assemblies

Dimensions:
31"L x 26"W x 21"H, WT: 8 lbs
